Objective

Ambitious and highly skilled web and software developer with over three years of experience in creating innovative, user-centric applications. At 19 years of age, I've already made significant strides in my career, building a wide array of digital solutions and leading a successful online learning platform. Currently pursuing advanced studies in Web and Software Development and Cybersecurity, I aim to leverage my expertise to drive impactful results for businesses and organizations.

Education

- **IPMC College of Technology, Accra, Ghana**

  Diploma in Web and Software Development

  2022 – 2025

- **University of Austin, Texas (Great Learning)**

  Certification in Cybersecurity

- **Apam Senior High School, Apam, Ghana**

  High School Diploma

  2020 – 2023

- **Ack Memorial School Complex**

  Primary and Junior High School Education

– 2020

Professional Experience

Web and Software Developer

2020 – Present

Developed and maintained various web and software applications, including delivery services, banking platforms, bulk email and SMS systems, a sporting app, a weather forecast app, and an e-commerce business website.

Collaborated with several companies to design and implement customized software solutions.

Provided technical support and maintenance for developed applications.

Led a small online learning organization, mentoring students in web development and software engineering.

Successfully managed multiple projects simultaneously, delivering high-quality results on time and within budget.

Web and Software Developer (Part-time)

[12 January] – [5 march]

Worked on a range of projects including:

i. Tracking System for Delivery: Developed a comprehensive tracking system that allowed customers to monitor their deliveries in real-time, improving transparency and customer satisfaction.

ii. SMS and Email Mailing Server: Implemented a robust mailing server to manage and automate bulk SMS and email campaigns, enhancing communication efficiency for the company.

Assisted in troubleshooting and optimizing existing applications.

Skills

Programming Languages: HTML, CSS, JavaScript, Python, PHP, Java, C.

Web Development: Frontend and Backend Development, Responsive Design, API Integration

Software Development: Application Design, Database Management, Version Control (Git)

Cybersecurity: Network Security, Cryptography, Ethical Hacking, Information Security

Tools & Technologies: Git, Docker, MySQL, AWS, Azure

Soft Skills: Problem Solving, Team Collaboration, Project Management, Communication

Projects

Delivery Service App: Developed a fully functional delivery service application with real-time tracking features.

Banking Platform: Built a secure banking platform with user authentication and transaction processing.

Bulk Email and SMS System: Created a bulk messaging system used by businesses for marketing campaigns.

Sporting App: Designed and developed an app providing live sports updates and news.

Weather Forecast App: Built a weather forecasting app with accurate and up-to-date information.

E-commerce Business Website: Developed an e-commerce website with a shopping cart, payment gateway, and product management features.

Online Learning Platform: Founded and currently operate a small online organization focused on teaching web and software development.

Achievements

Launched multiple successful software products by the age of 19.

Founded an online learning platform that has attracted a growing community of learners.

Built and deployed a suite of applications that are currently in use by businesses across various industries.
